

# **eSafety Label - Action Plan**

Action plan submitted by GÖKHAN KINCI for BURHANİYE ATATÜRK MESLEKİ VE TEKNİK ANADOLU LİSESİ - 23.01.2023 @ 21:03:47

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

# Infrastructure

#### **Technical security**

- An educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See <a href="www.europa.eu/youth/EU\_en">www.europa.eu/youth/EU\_en</a> for examples of discussions that can take place in the classroom on this topic, through role-play and group games.
- > Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.

#### Pupil and staff access to technology

- > Consider whether banning mobile devices is a rule that is fit for purpose and if your school might want to allow digital devices for some class activities. You could develop as part of your Acceptable Use Policy a section on how digital technologies can and cannot be used in the classroom; see the fact sheet on Using Mobile Phones at School (www.esafetylabel.eu/group/community/using-mobile-device-in-schools).
- All staff and pupils are allowed to use USB memory sticks in your school. This is good practice, and your Acceptable Use Policy should stipulate that all removable media is checked before use in the school systems. Check the fact sheet on Use of removable devices at <a href="https://www.esafetylabel.eu/group/community/use-of-removable-devices">www.esafetylabel.eu/group/community/use-of-removable-devices</a> to make sure you cover all security aspects.
- > It is good that in your school computer labs can easily be booked. Consider the option of integrating other digital devices into the lessons as using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.

## **Data protection**

> There is a retention plan in place for your school detailing how specific school records are stored, archived and disposed. This is very good. Ensure that the plan is followed and review it regularly to ensure it relates to the Data Protection Act and other relevant legislation. Check the according fact sheet for more information.

It is good that all users are attributed a different password by the system in your school. Remind all school members never to write their given password down anywhere, certainly not on a sticker on a computer! Also, ensure that the Acceptable Use Policy reminds staff and pupils to keep their passwords secure and not share them with others.

## **Software licensing**

- > It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.
- > Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.
- > It is good practise that the member of staff responsible is fully aware of installed software and their license status.

#### **IT Management**

# **Policy**

## Acceptable Use Policy (AUP)

- It is good that you have an Acceptable Use Policy (AUP) for pupils. You should now amend the AUP to include staff and the wider community. To ensure that your revised AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at <a href="https://www.esafetylabel.eu/group/community/acceptable-use-policy-aup-">www.esafetylabel.eu/group/community/acceptable-use-policy-aup-</a>.
- It is excellent that eSafety is an integral part of several school policies. Do all staff make reference to it when appropriate through their teaching? Look for examples of good practice and share these with staff and pupils.
  Produce a short case study to highlight this good practice and upload it to your profile on the eSafety Label portal via your My school area as inspiration for other schools.
- Regularly review the Mobile Phone Policy to ensure that it is fit for purpose and that it is being applied consistently across the school. The fact sheets on Using mobile phones at school (www.esafetylabel.eu/group/community/using-mobile-device-in-schools) and School Policy (www.esafetylabel.eu/group/community/school-policy) will provide helpful information.

#### **Reporting and Incident-Handling**

- Check that your School Policy includes all necessary information for teachers about handling issues when pupils knowingly or even inadvertently access illegal or offensive material online by going to the guidance set out by the teachtoday.de/en website (tinyurl.com/9j86v84). If such incidents arise in your school, make sure you anonymously fill out the eSafety Label Incident handling form (www.esafetylabel.eu/group/teacher/incident-handling) so that other schools can benefit from your experience.
- > Ensure that all staff, including new members of staff, are aware of the guidelines concerning what to do if

inappropriate or illegal material is discovered on a school machine. Ensure, too, that the policy is rigorously enforced. A member of the school's senior leadership team should monitor this.

- It's good that you have a clear School Policy on handling out-of-school eSafety incidents; is the number of these declining? Start a discussion thread in the community on what other preventative measures or awareness raising activities could be used in order to reduce the number of issues further. Don't forget to anonymously document incidents on the Incident handling form (<a href="www.esafetylabel.eu/group/teacher/incident-handling">www.esafetylabel.eu/group/teacher/incident-handling</a>), as this enables schools to share and learn from each other's strategies.
- Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline (www.inhope.org).

### Staff policy Pupil practice/behaviour

- Your school has a school wide approach of positive and negative consequences for pupil behaviour. This is good practice, please share your policy via the <u>My school area</u> of the eSafety portal so that other schools can learn from it.
- You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your <u>My school area</u> so that other schools can benefit from your experience.

#### **School presence online**

Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks (www.esafetylabel.eu/group/community/schools-on-social-networks) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.

# **Practice**

#### **Management of eSafety**

- In addition to a clear designation of responsibility to ensure that all necessary network security and user privacy checks are in place, it is essential that schools also have audit and procedural checks at regular intervals.

  Without this, a school will be leaving itself vulnerable. See our fact sheet on School Policy at <a href="https://www.esafetylabel.eu/group/community/school-policy">www.esafetylabel.eu/group/community/school-policy</a>.
  - Although there should always be an overall lead person on eSafety just as you have in your school, everybody in the school has a shared responsibility to secure any sensitive information used in their day to day professional duties. Even staff not directly involved in data handling should be made aware of the risks and threats and how to minimise problems. Use our fact sheet Acceptable Use Policy
  - (www.esafetylabel.eu/group/community/acceptable-use-policy-aup-) to ensure that everyone plays their part in

ensuring they are all the best and safest digital citizens they can be.

### eSafety in the curriculum

- It is excellent that consequences of online actions are discussed with pupils in all grades. Terms and conditions need to be read to fully understand contractual conditions. This can also concern aspects of data privacy.
  Another important topic is breach of copyright. Please share the materials used through the uploading evidence tool, accessible also via the Myschool area.
- > It is very good that, in your school, pupils are taught from an early age on about responsibilities and consequences when using social media. Please share any resources through the uploading evidence tool, accessible also via the <a href="My school area">My school area</a>.
- It is good practise that in your school Cyberbullying is discussed in the curriculum with pupils from a young age.

#### Extra curricular activities

How do you organise peer mentoring among pupils on eSafety? Check out the resources of the <u>ENABLE project</u> and share your ideas in the <u>forum</u> of the eSafety Label community so that other schools can benefit from your experience to establish a similar approach.

#### **Sources of support**

- Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at <a href="https://www.esafetylabel.eu/group/community/information-for-parents">www.esafetylabel.eu/group/community/information-for-parents</a> to find resources that could be circulated to parents and ideas for parent evenings.
- > It is good to know that other school services are involved in eSafety issues (e.g. counsellors, psychologists, school nurse). Are they also invited to contribute to developing and regular review of your School Policy? Publish a case study about how this is managed in your school on your school profile page on the eSafety Label project website, so that others can learn from your experience.
- > It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.

#### Staff training

- It is good practise that you provide information to teachers on the technology used by pupils in their freetime.

  This is important as this awareness is the first step in addressing the issue of powering down for school. At the same time pupils should not be asked to do their homework using technology not available to them outside of schools. You might want to have a look at the <a href="Essie Survey of ICT">Essie Survey of ICT in schools</a>.
- > Your school makes sure that every teacher is trained on cyberbullying. Please share resources that are used in these trainings via uploading them to your <u>My school area</u>. Are you also monitoring the effect that this training had on the number of incidents?

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the <u>Upload evidence</u> on the <u>My school area</u> section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the <u>Forum</u>, and your <u>reporting of incidents</u> on the template provided are all also taken into account.
